Subject: Engineered Protection Systems, Inc (EPS) quote

Mike,

Attached is the quote from EPS for a security system that monitors and records activity for 30 rolling days with 4 cameras and a storage device. Also included are 2 panic buttons to notify police and a viewing station for the office to watch. The cost for the camera system is \$2,325 and for the panic buttons is \$700 (total=\$3,325) which would come from the capital improvement fund. However, there are monthly ongoing costs of \$31 for the camera system and \$55 for the panic system. This amounts to \$1,032 to be incorporated into the annual operating budget. That's my brief summary.
